

Everbridge Awarded contract by the Virginia Information Technologies Agency (VITA) for Emergency Alert and Notification Services

VITA has awarded an “optional use” contract for emergency alert and notification services. This contract will provide the Commonwealth of Virginia, including Localities, Higher Education and K-12 organizations, a cost effective streamlined procurement mechanism that consists of a “fully hosted solution” which includes citizen alerting and employee notification capabilities. Notifications may be sent as emails, texts or phone calls. The contract shall be effective for a two (2) year period with three (3) additional one (1) year extensions.

Servicing all public bodies in the Commonwealth of Virginia including State & Local government agencies, Higher Education and K-12 institutions, this contract is designed to eliminate equipment and maintenance costs, reduce paperwork and ultimately is a procurement vehicle that will result in savings for the Commonwealth of Virginia both in procurement efficiency and in the costs emergency alert and notification services.

The Virginia Department of Emergency Management will be the first user of the contract and plans on utilizing the employee notification capability, to send alerts to its employees during emergencies. The contract also allows state and county governments to notify emergency responders to activate during emergencies.
