

Adding a Trusted Site

eVA reporting takes twice as long to download report data unless the website's URL is added as a trusted site. Using Internet Explorer without this browser setting results in the following popup message at the top of your screen when choosing to download data.

To prevent this message in IE, add eVA applications as a trusted site:

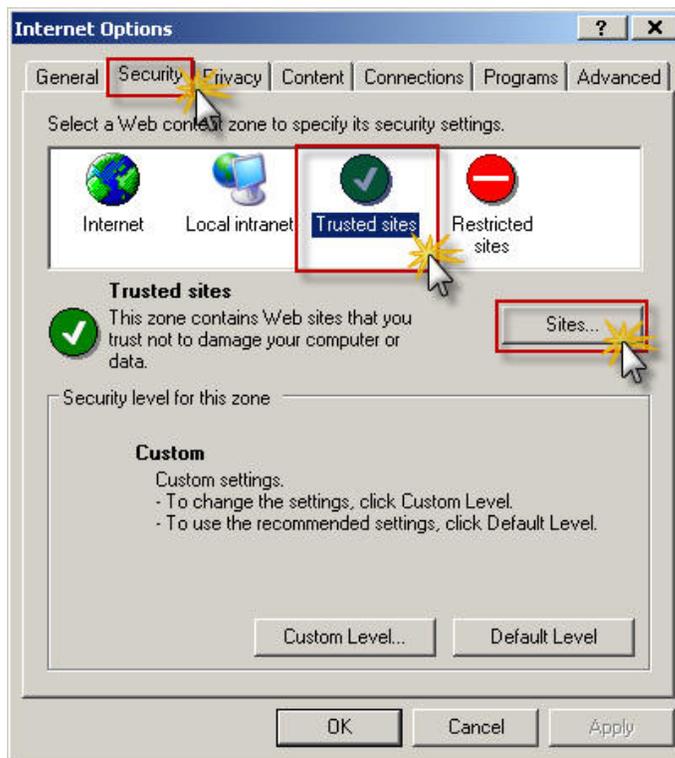

1. Select **Tools** on the IE 8 Menu bar

2. Select Internet Options

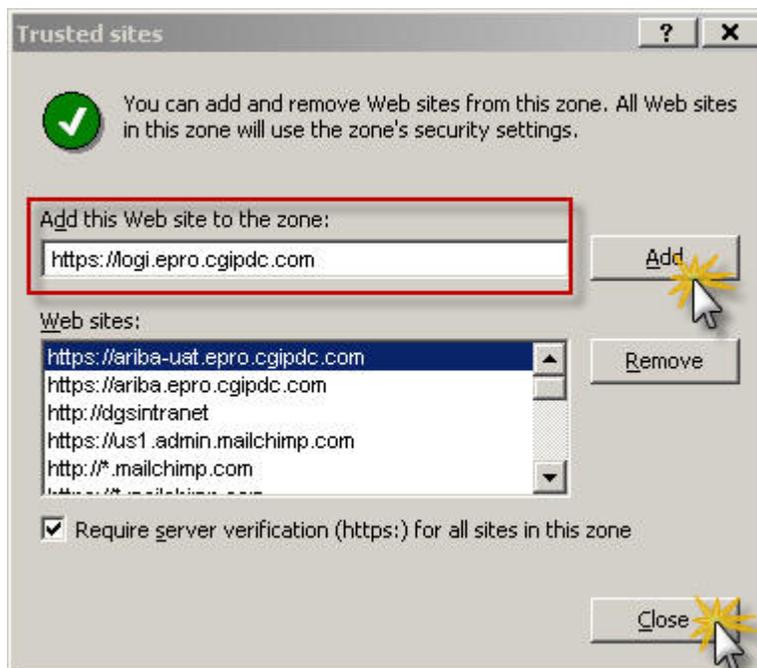

3. Select the **Security** tab & select **Trusted Sites**

4. Select **Sites** next to the Trusted Sites area

5. Enter the following websites, clicking the **Add** button for each. Then click **Close**.
- <https://logi.epro.cgipdc.com>
 - <https://buyer.epro.cgipdc.com>
 - <https://ariba.epro.cgipdc.com>

6. You should close & restart your browser, then log into eVA.
